

Working definition of 'clinically extremely vulnerable'

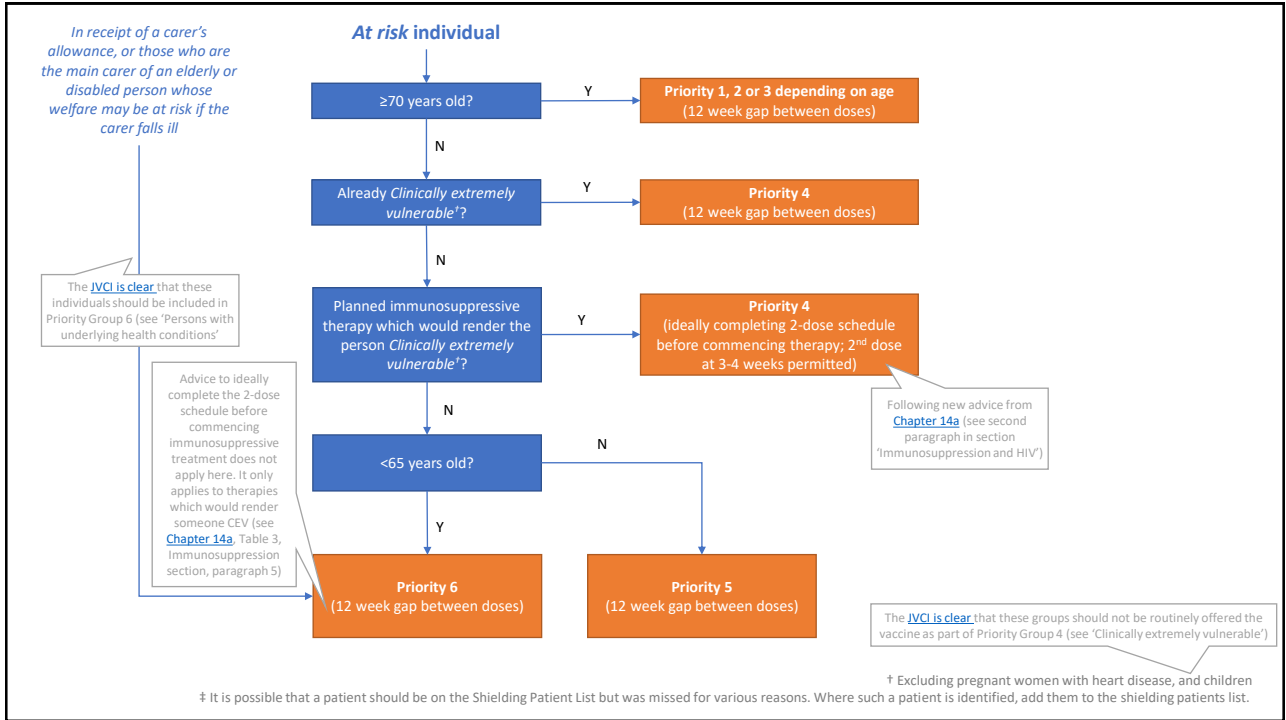

NCL COVID-19 Vaccine Pharmacy Group
09 February 2021

1

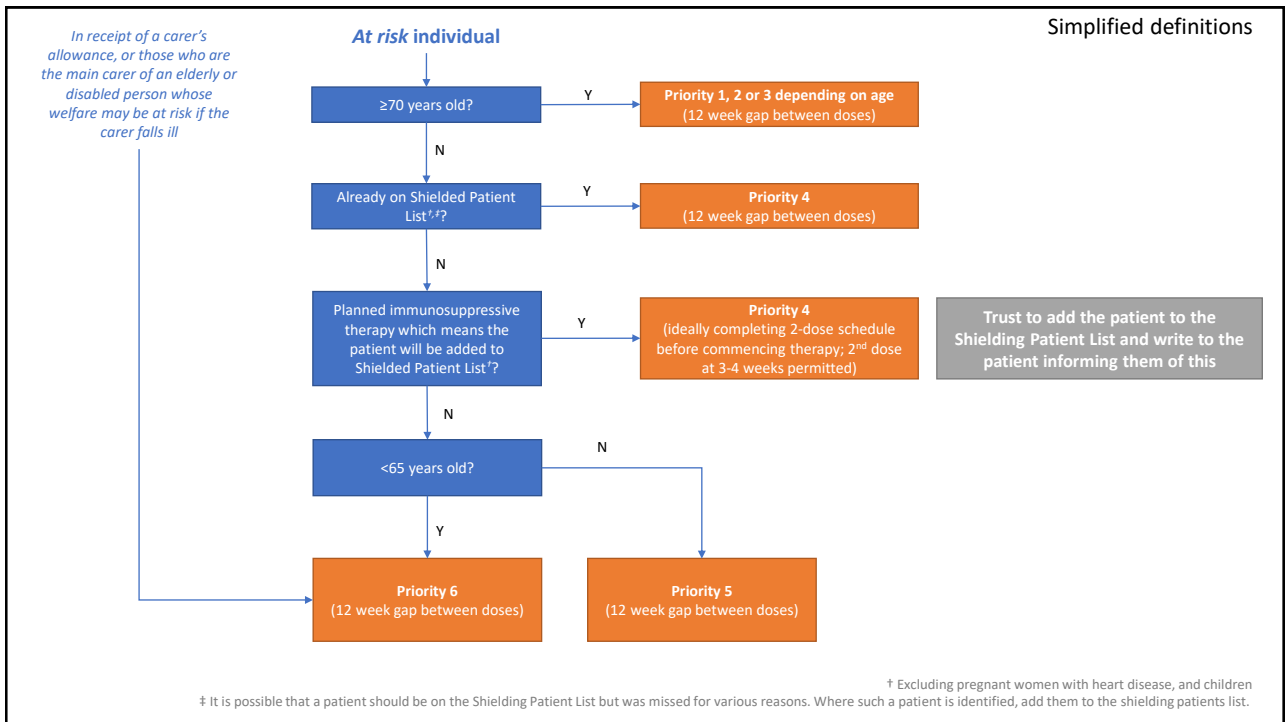

Key messages

- Patients who are clinically extremely vulnerable (CEV; Priority Group 4) are those who are on, or should be on, the Shielding Patient List
- The 3-4 week vaccination schedule is only available to those who are scheduled to receive immunosuppressive therapy which would **newly render** them CEV (i.e. not currently CEV).
